EDUCATION

Georgetown University

May 2025

B.S. Computer Science

GPA: 3.84

Relevant Coursework: Data Structures/Algorithms, Computational Structures, , Operating Systems, Deep Reinforcement Learning

PROFESSIONAL EXPERIENCE

SpaceX | *Software Engineer Intern*

Los Angeles, CA | Jun 2024 – August 2024

- Built new integrations for manufacturing planning software in Angular and .NET framework saving **millions of dollars in reworks**
- Proposed and implemented risk reduction and traceability features in non-conformance tracking .NET app **reducing 2% of all out of tolerance parts**
- Lead the implementation of these features talking to non-technical users and designing systems end to end

Lumen Technologies | *Software Engineer Intern*

San Francisco, CA | Jun 2023 – August 2023

- Built API dashboard tracking **billions of dollars in IT infrastructure orders**
- Designed, coded, and proposed a more efficient issue tracking system for APIs used thousands of times daily resulting in a **60% decrease in issue resolution time**
- Built frontend interfacing with PostgreSQL backend in Vue.js

The Corp (Students of Georgetown Inc.) | *Lead Software Engineer*

Washington, DC | September 2021 – Current

- Led the design and development of data visualization tool in React and Django to automatically reprice **millions of dollars of goods**. Improved company **profit by 10%**
- Built the frontend and backend for a new employee access portal used by 300+ employees daily. **Improved HR task efficiency by 30% and saved hundreds of hours weekly**
- Coded and implemented new COVID testing procedure forms used thousands of times weekly. Brought company in line with critical, emerging COVID regulations.

PROJECTS

[InTongues](#) | React, NextJS, Prisma, PostgreSQL, Vercel, AWS Lambda

January 2024 – Current

- Designed and developed full-stack, automated video language dubbing service supporting 15+ languages.
- Attracted paying customers collectively paying over \$10,000 dollars annually**

[NFT Instagram](#) | React, JavaScript, GraphQL, Django, PostgreSQL

Apr 2022 – May 2022

- Designed a robust NFT gallery creator for artists and collectors. Built in social media features such as ability to follow users or customize feed.
- Developed an intuitive and responsive React frontend and GraphQL backend designed with Django and PostgreSQL.
- Organically obtained 2000 users before shutting down**

[Meal Planner](#) | React, JavaScript

September 2021

- Meal planner that curates recipes for breakfast, lunch, and dinner based on an individual's daily calorie goals
- Designed custom, interactive React frontend, making API calls to recipe database

SKILLS & INTERESTS

Languages: Java, Python, C, SQL, HTML, CSS, JavaScript, TypeScript, C++

Development Frameworks: React, Next, Flask, AWS, Supabase, MongoDB, Prisma, Git, Node, Vercel, GraphQL, Tailwind, PostgreSQL, Docker, Angular, .NET Entity Framework

Honors & Awards

Debate National Champion: First place out of tens of thousands at 2020 National Debate Coaches Association Tournament
